

Net2 PaxLock

Get the edge with Net2 PaxLock combining smart wireless technology with Paxton's powerful Net2 system

The unit comprises a networked access control system in a door handle, combining wireless security with a stylish slimline proximity reader.

Net2 PaxLock is a real time-saver on site as it can be installed so quickly and comes ready to fit a standard Euro lock case. The battery powered unit uses Paxton's low power and secure wireless technology to get the edge over your competitors.

Genuine online wireless system

- Manage reports in the Net2 software in real time
- All system updates occur wirelessly across the network
- Door contacts compatible to detect 'door forced' or 'door left open' status

Full battery management system

- Battery life of several years & low battery alert in Net2 software
- Intelligent low power mode option for the most economical solution
- Easily replaceable AA batteries keeps maintenance to a minimum

Communicates using Net2Air technology

- Paxton's established secure and reliable wireless protocol
- Save time and use with the Net2Air site surveyor for faultless wireless installation

Advanced security and flexibility

- Mifare or Net2 proximity compatible versions for a variety of site requirements
- Works with all other Net2 control units
- Interchangeable door handle for ultimate aesthetic flexibility
- Key override function for added security
- Robust mechanical design

Now you can add this breakthrough unit to your product offering and enjoy all the benefits of Paxton's market leading service.

- Industry leading technical support
- Simple to manage software
- 25 years of trusted technology
- Ultimate returns policy & 5 year guarantee
